## PERSONAL PROJECTS

### Sound Threshold Meter Android App

- An android app which measures sound in different locations in decibels and notifies the user when the threshold is crossed. Its clean and beautiful user interface makes it all the more user-friendly.

### Airline Reservation System

- A web portal to reserve your seats in advance in any airlines by just giving your flight number.

### Web Portal to Mark Attendance

- On the "Dashboard" towards the right, if you see a digital time clock with the "Mark Attendance" button, that's when you will be able to mark your web-time clock

### Web Routine App

- It is a portal where user can mark their daily routine. This app is for students with minor learning disabilities.
